### Important information about this document

This target market determination (**TMD**) has been prepared by the Company in relation to an offer of up to 353,888,372 free-attaching unquoted Options to be issued to Eligible Shareholders pursuant to a renounceable pro-rata entitlement offer of New Shares, each with an exercise price of \$0.006 and expiring two years from the date of issue (**Options**), pursuant to the Company's prospectus (available at <https://enterprisemetals.com.au/>) dated 4 June 2024 (**Prospectus**).

Capitalised terms used, but not defined, in this TMD have the meaning ascribed to them in the Prospectus.

Pursuant to the Prospectus, Eligible Shareholders who apply for New Shares under the Entitlement Offer, Top-Up Offer and Shortfall Offer are being offered 1 Option for every 1 New Share subscribed for under the Entitlement Offer, Top-Up Offer and Shortfall Offer (**Offers**).

Only persons that fall within the target market set out in this TMD will be eligible to subscribe for the Options.

Any eligible recipient of this TMD should carefully read and consider the Prospectus in full and consult their professional adviser if they have any questions regarding the contents of the Prospectus. Any recipient of this TMD who, being eligible, wants to acquire Options under the Prospectus will need to complete the relevant Application Form. There is no cooling off period in respect of the issue of the Options. This TMD is not a disclosure document for the purposes of the *Corporations Act 2001* (Cth) (**Corporations Act**), and therefore has not been lodged, and does not require lodgement, with ASIC.

This TMD does not take into account what you currently have, or what you want and need, for your financial future. It is important for you to consider these matters and read the Prospectus before you make an investment decision. The Company is not licensed to provide financial product advice in relation to the Options.

TMD requirement	Determination
Investment objective	The Company expects that an investment in the Options will be suitable to investors who wish to gain exposure to equities in a small/mid mining company listed on the ASX and are either Eligible Shareholders or are otherwise eligible to participate in the Shortfall Offer.
Investment timeframe	The target market of investors will take a short to medium term outlook on their investment. Investors with a short-term outlook for their investment should be aware that the Company will not be seeking quotation of the Options on ASX. The Options are

TMD requirement	Determination
	<p>not transferable (except with prior written approval of the Company at its sole discretion and subject to compliance with the Corporations Act and the ASX Listing Rules) and are therefore not suitable for investors looking to trade the Options prior to exercising the Options.</p> <p>Option holders will also have an ability to exercise Options and trade the underlying Shares issued on exercise, however, investors should be aware that such a dealing is only likely to be commercially viable in the event the trading price of the Shares exceeds the exercise price of the Options both at the date of exercise and sale of the underlying Shares.</p> <p>Investors with a medium-term outlook will benefit from an ability to exercise Options within the 2 year term of the Options and increase their shareholding and exposure to the potential upside in the Company's Shares into the future.</p> <p>Given the need to pay the exercise price in order to acquire the underlying Shares, investors in the target market are those who are in a financial position that is sufficient for them to invest their funds over a 2 year time horizon, during which time their ability to liquidate their Options may be limited on exercise of the Options by the trading price of the underlying Shares.</p>
Investment metrics	<p>While the Company does not have an established eligibility framework for investors based on metrics such as age, expected return or volatility, it is expected that the target market of investors will be able to withstand potential fluctuations in the value of their investment. The Options offer no guaranteed income or capital protection.</p>
Risk	<p>The Company considers that, while the issue price of the Options is free, an investment in the Company offered in connection with the Prospectus (for example, through the exercise of the Options) should be considered highly speculative, such that an investment in the Company is not appropriate for an investor who would not be able to bear a loss of some or all of the investment. Investors should also have a sufficient level of financial literacy and resources (either alone or in conjunction with an appropriate adviser) to understand and appreciate the risks of investing in Options as an asset class generally and the more specific risks of investing in an Australian listed mining company.</p>
Distribution conditions	<p>The Options are only being offered to Eligible Shareholders under the Offers (<b>Eligible Participants</b>).</p> <p>The Options will also be subject to the distribution condition that the Eligible Participants will be provided with a copy of the Prospectus and access to this TMD before they apply for the Options.</p> <p>The Prospectus includes jurisdictional conditions on eligibility. The Company will also include a copy of this TMD on its web landing page for the Offers.</p> <p>Only Eligible Participants that receive an Application Form which accompanies the Prospectus be eligible to subscribe for the Options.</p> <p>The Company considers that these distribution conditions will ensure that persons who invest in the Options fall within the target market in circumstances where personal advice is not being provided to those persons by the Company.</p>
Review triggers	<p>The Options are being offered for a limited offer period set out in the Prospectus, after the conclusion of which the Options will no longer be available for investment by way of</p>
